

OPTIMIZE MEDICATION ADHERENCE WITH ACTIONABLE INTELLIGENCE

INSIGHTS FOR MEDICATION ADHERENCE

Insights for Medication

Adherence **provides actionable patient intelligence** in the form of patient-specific medication adherence summaries and real-time insights. Information is delivered within your EHR at the point of care to help you increase adherence, address care gaps and improve patient outcomes while reducing costs.

OF PATIENT VISITS
INVOLVE DRUG THERAPY.¹

50%

OF PATIENTS
NEVER TAKE THEIR MEDICATION
AS PRESCRIBED.²

MEDICATION
NON-ADHERENCE
COSTS THE U.S.

\$300 BILLION
ANNUALLY.³

MEDICATION
NON-ADHERENCE REPRESENTS
UP TO 10%
OF HOSPITAL ADMISSIONS
AND ONE-THIRD OF ADVERSE
DRUG EVENTS RESULTING
IN A HOSPITAL ADMISSION.⁴

Neil Simon
Chief Operating Officer
Aprima

"Surescripts helps paint a better picture of who a patient is and how to get the best outcome possible. Physicians have a complete view of a patient's medication and their likelihood of complying with the prescription instructions, which helps to tailor how a doctor might approach treatment and follow up on a patient-specific basis."

Insights for Medication Adherence

TACKLE MEDICATION NON-ADHERENCE WITH UNRIVALED ACTIONABLE INTELLIGENCE.

Insights for Medication Adherence makes patient-specific adherence summaries and real-time messages from pharmacy benefit managers (PBMs) and health plans readily available within your EHR workflow. A Proportion of Days Covered (PDC) score helps you easily identify whether medications are being taken as prescribed and address any gaps in care while the patient is in your office.
